A. ASSEMBLY

The following are the steps in assembling the PWD Handwashing Station.

1. The Parts:

Main Frame

Bucket x2

Tap kit x1

2. Slowly spread the Main Body Frame until the chains on side of the assembly straightens.

3. Press the shelf until the other end sits on the sits on the support. Flip open the basin holder and hook on the chains at both corners onto their respective eyebolts.

4. Lift the outlet holder up from the basin. Slot in the chain as shown. Plug the outlet hose in to pipe holder as shown.

5. Attach the tap to the upper bucket (with hole). Use the items in the tap kit (plastic tap, plastic nut, 2 silicon washers).

6. Place bucket w/tap on the shelf and connect the inlet hose to the tap. Insert liquid soap. Insert paper towel. Put drainage hose inside 2nd bucket.

How to use the Handwashing Station.

1. Fill the top bucket with water up to the brim. Open the tap.
2. Press down on the basin to release water.

B. PRECAUTIONARY MEASURES

1. Always situate your unit in a more stable and flat surface area to avoid it to topple down.
2. Beware of getting clipped when you open the handwashing station.
3. Don't let kids climb into the unit.
4. This Product is not for drinking purposes
